PROFILE: Alastair is an outgoing, gregarious and friendly individual who combines optimism, enthusiasm, persuasion and fact in order to win others to his point of view and to achieve his goals.

Alastair has over 24 years experience in the construction industry and safety consultancy. Experience has been gained in a wide variety of environments including airports, roads, harbour developments, residential and mixed-use developments, MOD establishments, shopping centres, hospitals and healthcare properties, multi-storey office developments, industrial buildings and large in and out of town redevelopments.

Alastair is a specialist in corporate safety governance, and corporate CDM compliance. Alastair acts as corporate advisor to and assists a number of blue chip developers and clients and professional institutes with due diligence compliance and high-level advice in conjunction with legal advisers.

Alastair's broad spectrum enables him to acts both as an experienced CDM Coordinator and corporate health and safety advisor

Alastair's broad spectrum enables him to acts both as an experienced CDM Coordinator and corporate health and safety advisor. He has undertaken the role of CDM Coordinator on projects of varying ranges and sectors up to £1 billion in construction value across the private and public domains. He has also undertaken the role of CDMC direct to the HSE.

Alastair's other activities have included the development of e-safe₁₀₀ electronic software devised especially for the construction industry, devising and development for a blue chip developer of a health and safety web-based data intranet site for monitoring the performance of their main contractors as a tool to demonstrate due diligence as a major client organisation and provision of good practice and safety advice for the DfES for their recent TV advertising campaign to encourage students to pursue further education.

Alastair has particular responsible for our southern and capital projects portfolio and undertakes the role of CDM Coordinator on highly complex and large developments. Some of the most recent office developments have included: -

£70m Riverbank House - Demolition of old and new 10 storey office

£120m Selborne House - Demolition of old and new 12 storey office

£33m Wellington House - Demolition of old and new 9 storey office

£10m Holbrook House - Part demo, part new and extension of 9 storey office

£10m Ireland House - Demolition of old and new 6 storey office

£45m 16 18 Finsbury Circus - Part demo, part new and extension of 9 storey office
